

Premium Transmission Sampling Kit – All the Tools for Easy Preparation of Transmission Measurements of Liquids and Solids

The Premium Transmission Sampling Kit is a general purpose kit containing tools and materials for liquid and solid sampling. A demountable cell (drilled and undrilled windows with precision Teflon® spacers, plus 2" x 3" standard cell holder) is provided for measurements of liquid samples. Viscous liquids can be measured directly as a thin film between the KBr windows. The kit includes Pixie, a small bench top hydraulic press, for the easy preparation of 7-mm KBr pellets. A mortar with pestle and Nujol™/Fluorolube® are provided for mull making – another popular method for preparation of solid samples. In addition, the kit contains a set of the most popular sample holders including the universal holder for polymer films, KBr pellet holder and PIKE disposable/storage cardboard cards for pellets and polymer films.
